

# LIVE

This section describes the three different areas on the application's LIVE screen.

- The [Actor Live View](#) lists all actors in the current show with additional status information. It can also be used to control various live settings for individual actors.
- The [Fixture Live View](#) lists all fixtures in the current show with additional status information. It can also be used to control various live settings for individual fixtures.
- The [Live Show Renderer](#) renders various live show elements as positioned in the zacktrack coordinate system.
