

# Connect zacktrack Puck to a WIFI network

If the LED shines continous blue search for a zacktrackPuck network on your device.

1. Connect your device to the network and wait for a few seconds.
2. A pop-up brings you to the zacktrackPuck config window. (You can type 192.168.4.1 in your browser to go there manually)

1. Press the  Button to scan for availabe networks.

1. List of all available networks (zacktrackCore standard → “zacktrack”)
2. Credentials of chosen network
3. zacPuck network settings (default settings should remain unchanged)

4. Choose a network by pressing on it or entering the SSID. Put in the password an hit save.

**If your desired network is not shown you can hit the scan button to rescan or enter the SSID and password manually.**

If the configuration succeeded the following dialog comes up:
