

Connect the client to zacktrack CORE

1. Connect the zacktrack tablet to the wifi network that starts with "zacktrack" and contains your system dependent suffix (take the password from your login sheet)

Note: If you changed the wifi settings, your wifi might have another SSID or password.

2. Open the zacktrack APP on the tablet
3. Tap  on the top right corner to open the connection dialog 
4. The zacktrack APP tries to discover your zacktrack server.

If your server is in the list, connect to the server by tapping on the list entry.

You can connect to your zacktrack server even if it is not in the list by tapping "Enter IP Manually". Enter zacktrack CORE IP address (Standard IP: 10.20.1.1) and tap "OK"

When you are connected to zacktrack CORE, the server sign will show the following sign 

From:
<https://manual.zacktrack.com/> - **zacktrack**
