

# New Show

You can create a new show by tapping on the **New Show** option in the [menu](#).

1. Select if you want to create an empty show, or if you would like to start with your default show.
2. Tap Create to create a new local show.

**Note: This will only overwrite your LOCAL show. The active show on the server will be unchanged until you decide to upload your local one.**

When you decided to create an empty show, your local show file will be completely empty except for a single, mandatory **out** universe as well as a *default* scene, fixture group, and actor group.
