

BASIC PREPARATIONS

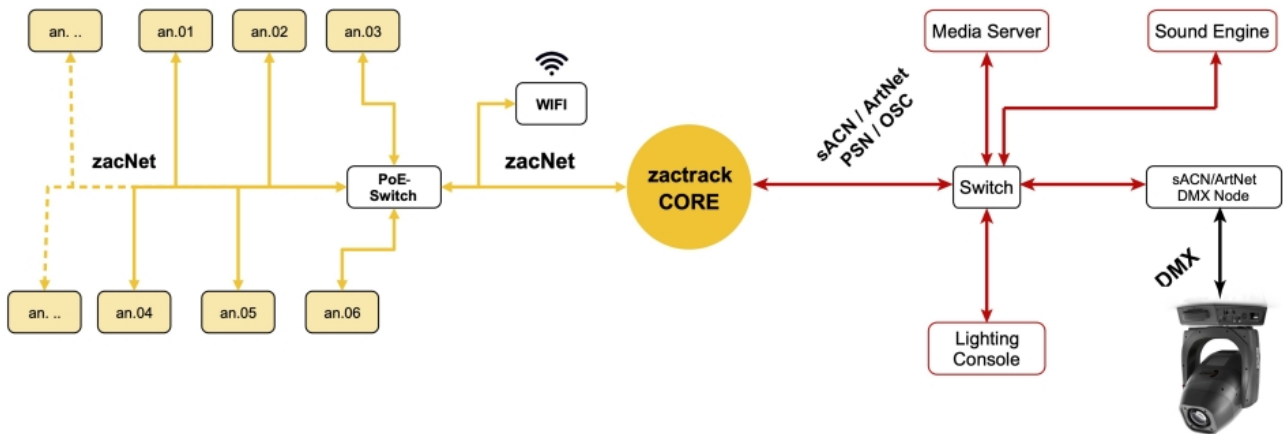

To operate a Zactrack System, some basic preparations are necessary.

Connect the Zactrack Server as seen in the lower picture. Each Anchor needs a POE supply. It is possible to use different switches. See also [Network](#)

Put the Trackers in the charging station and connect a 5V USB power supply. Wait until the trackers are fully charged (green constant light).

Also charge the 4 Pucks, with the USB cable. They are only necessary for a setup process.

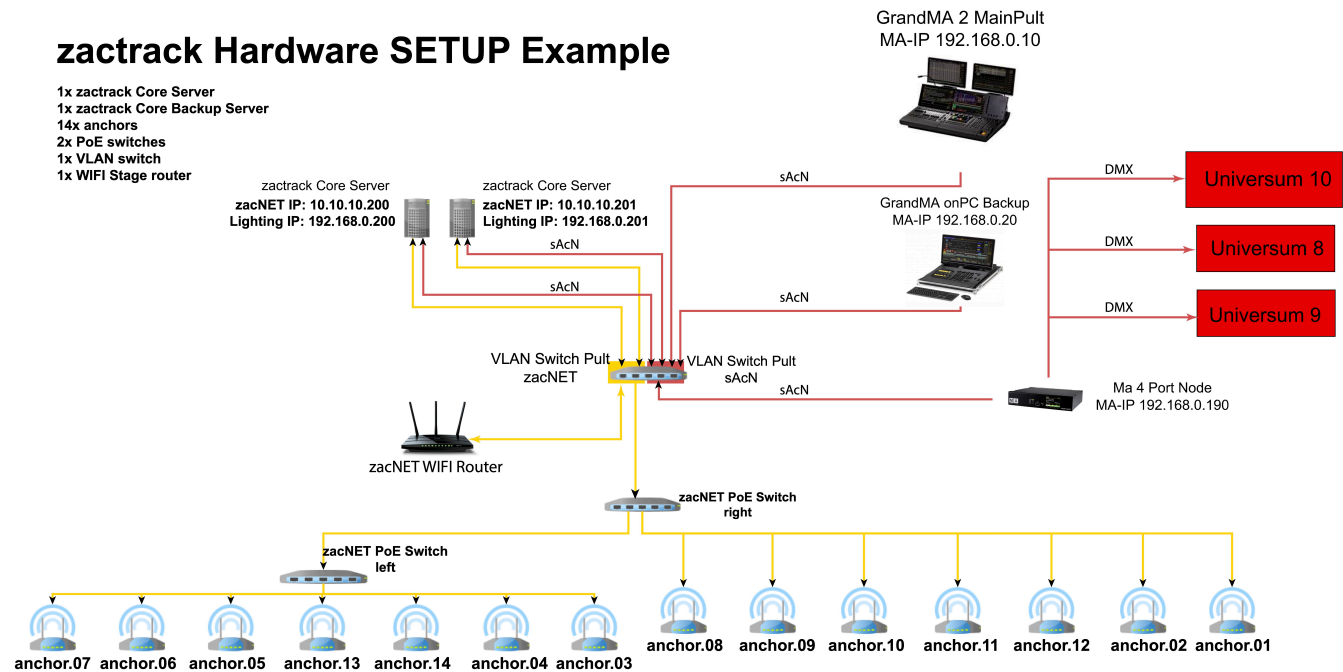

Hardware Setup Overview

A zactrack Setup could look like this

In this example a Main and a Backup Server is used. **Attention a Zactrack Smart System is limited at 8 Anchors!**
